CAREER OBJECTIVE

Aspiring UI/UX Designer and CSE undergraduate whose core strength lies in **visual storytelling**: the ability to translate complex ideas into experiences that resonate, inform, and move people. From crafting interfaces to leading media at flagship university events, my work is grounded in the belief that the best design does not just look good; it tells a story worth remembering. I seek opportunities at the intersection of product design and technology, where I can build meaningful, human-centered digital experiences and bring entrepreneurial ideas to life.

EDUCATION

BML Munjal University	2024 – 2028
Bachelor of Technology in Computer Science & Engineering	CGPA: 7.61
12th / Higher Secondary – Science	CBSE 82.8%
10th / Secondary	CBSE 90.6%

SKILLS

Languages	Python, Java, C, JavaScript, HTML/CSS
Frameworks & Databases	MongoDB, MySQL, Pandas, NumPy
Design & Tools	Figma, Framer, Bravo, Adobe Illustrator, Blender, Canva
Platforms	Android Studio, GitHub, Arduino Studio

PROJECTS

UI/UX Design Portfolio

Portfolio

Figma, Framer, Bravo

- Designed and delivered 5+ high-fidelity prototypes for web and mobile applications, applying user-centered design principles to enhance usability and visual coherence.

Project Headway – Overspeed Prevention System

Ongoing · Pre-Startup Stage

C, MySQL, Figma, Bravo, Arduino Studio

- Developing a hardware-software system to prevent vehicle overspeeding, with a roadmap to launch as a road safety technology startup.
- Leading hardware architecture, embedded implementation, and companion app UI design.

UniGlobe – University Search Platform

GitHub

HTML, CSS, JavaScript, MongoDB, Figma

- Developed a full-stack platform to help students discover universities based on personalized preferences.
- Iterated through five design cycles informed by user feedback; implemented filtering and personalized search.
- Integrated MongoDB for efficient data storage and retrieval.

University Search Mobile App

Ongoing

Java, Android Studio, MySQL

- Built a native Android application with a responsive, user-friendly interface and real-time database integration.

MelodyMatch – Music Recommendation System

GitHub

Python, MySQL

- Built a filter-based music recommendation engine using structured datasets and an optimized relational database schema.

ACHIEVEMENTS & RESPONSIBILITIES

- 4th Position – Smart India Hackathon (SIH-2024):** Delivered an innovative solution among hundreds of competing teams nationwide.
- Campus Ambassador, BML Munjal University** Jun 2025 – Present
Designated official student representative; drives campus engagement and bridges the institution with prospective students.
- Media Lead – Propel PitchFest & Hult Prize BMU** Sept 2024 – Feb 2025
Directed media production and visual storytelling for two flagship university startup events, end-to-end.
- Media Team Member – TEDxBMU** Apr 2025 – May 2025
Produced video content and managed event coverage for BMU’s official TEDx chapter.
- Active contributor across **22+ student clubs and campus organizations** at BML Munjal University, spanning entrepreneurship, technology, media, and cultural domains.

Certifications

Google UX Design Professional Certificate	Google · Coursera
Generative AI Foundations	upGrad
Advanced Prompt Engineering using ChatGPT	upGrad
